EDUCATION

Bachelor of Science in Computer Science Wright State University, Dayton, OH	December 2026
Master of Science in Data Science Wright State University, Dayton, OH	December 2027

RELATED COURSEWORK

Applied Machine Learning	Intro to Software Engineering	Independent Study Capstone Project	Cyber Network Security
Statistical Methods I	Database Management		

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, Kotlin, JavaScript/TypeScript, HTML/CSS, Tailwind, Bootstrap, Angular
Databases: MySQL, Firebase, DBeaver
Data/ML: Pandas, NumPy, Matplotlib, Seaborn, scikit-learn

EXPERIENCE

Research Student – DASH Lab Wright State University, OH	Aug 2025-Present
- Developed and maintained an Android based research application for analyzing flow state behavior, supporting data collection across multiple users. - Refactored storage architecture using Android-native APIs, eliminating data loss issues and improving reliability across devices. - Integrated Firebase Realtime database and authentication, enabling secure, cloud-based data access for research terms. - Designed interactive visualization components to analyze survey responses across multiple categories, improving interpretability of behavior data.	
Computer Science Teaching Assistant Wright State University, OH	Aug 2023 – Present
- Mentored 40+ students in Java programming, debugging techniques, and problem-solving strategies. - Designed lab assignments and project-based learning activities to reinforce core software development concepts. - Provided detailed feedback on code structure, logic, and best practices to improve student performance.	

COURSE PROJECTS

Flow Survey Application (Android application)	August 2025-Present
- Built a research-focused Android application for collecting and analyzing behavioral data related to flow state. - Implemented cloud-based storage and authentication using Firebase, transitioning the system from a local prototype to a scalable research tool. - Developed data visualization features to support analysis of survey responses across multiple psychological categories.	
Penny Bread (Make-It Wright Hackathon)	Spring 2025
- Designed a user-focused application to help users make budget-conscious grocery decisions through structured filtering and data-driven insights. - Built intuitive UI components for comparing pricing and optimizing purchase decisions. - Integrated backend data processing to support real-time filtering and recommendations.	
Master Chef (Full-Stack Features)	Spring 2025
- Developed a multi-user recipe management system with real-time data synchronization. - Implemented pantry tracking and automated ingredient-based recommendations. - Designed features include authentication, cooking timers, and dynamic shopping list generation.	

Crime Prediction System (Machine Learning)

Spring 2024

- Analyzed large datasets using Pandas and NumPy to identify patterns in crime data.
- Built and compared regression and neural network models to evaluate predictive performance.
- Visualized trends and model outputs using Matplotlib and Seaborn

LEADERSHIP/ ACHIEVEMENTS

Vice President of Community Council (RCA)	2025-Present
Member of NRHH and SWE	2024 – Present
College of Computer Science and Engineering Dean’s List	2025
Participant Make-It Wright Hackathon	2026
Vice President of Recruitment NRHH (The Wright Chapter)	2024-2025
NRHH Bronze pin Award	Spring 2025
